Project      : Sales Analysis using SQL
File Name    : 01_Data_Cleaning.sql
Author       : Om Tripathi
Email        : omt7060@gmail.com

Description :
This script performs the data cleaning and preprocessing steps required
before building the Sales Data Warehouse. It converts the Sale_Date
column into MySQL DATE format and prepares the dataset for Star Schema
implementation.

Steps Performed:
1. Create the database.
2. Select the database.
3. Review the raw dataset.
4. Convert Sale_Date from TEXT to DATE.
5. Remove the original Sale_Date column.
6. Rename the cleaned date column.
7. Verify the cleaned dataset.

=====
*/

--
=====
-- STEP 1: Create and Select Database
--
=====

CREATE DATABASE sales;
use sales;
--
=====
-- STEP 2: Review Raw Sales Dataset
--
=====

SELECT *
FROM sales_data;

--
=====
-- STEP 3: Add a New DATE Column
--
=====

ALTER TABLE sales_data
ADD COLUMN New_Sale_Date DATE;

```

```

--
=====
-- STEP 4: Disable Safe Update Mode
--
=====

SET SQL_SAFE_UPDATES = 0;

--
=====
-- STEP 5: Convert Sale_Date to DATE Format
--
=====

UPDATE sales_data
SET New_Sale_Date = STR_TO_DATE(Sale_Date, '%d-%m-%Y');

--
=====
-- STEP 6: Remove the Old Sale_Date Column
--
=====

ALTER TABLE sales_data
DROP COLUMN Sale_Date;

--
=====
-- STEP 7: Rename the Cleaned Date Column
--
=====

ALTER TABLE sales_data
RENAME COLUMN New_Sale_Date TO Sale_Date;

--
=====
-- STEP 8: Verify the Cleaned Dataset
--
=====

SELECT *
FROM sales_data;

```
