

Business Requirements Gathering

Business Problem

The sales department wants to analyze historical sales data to understand business performance, identify revenue trends, evaluate product and regional performance, and support data-driven decision-making.

The current raw sales data provides transaction-level information but lacks summarized insights needed by business stakeholders.

Business Objectives

The primary objectives of this project are:

- Analyze overall sales performance.
 - Identify the most profitable product categories.
 - Measure regional sales performance.
 - Track monthly sales trends.
 - Evaluate sales representative performance.
 - Measure business profitability.
 - Identify revenue growth over time.
 - Build a scalable data model for reporting and dashboard development.
-

Stakeholders

This analysis is intended to support:

- Chief Executive Officer (CEO)
 - Sales Manager
 - Regional Sales Managers
 - Finance Team
 - Business Analysts
-

Business Requirements

The business requested the following reports and KPIs:

Revenue Analysis

- Calculate Total Sales Revenue.
- Calculate Average Sales Amount.

- Identify Highest and Lowest Sales.
 - Calculate Total Number of Transactions.
-

Profitability Analysis

- Calculate Total Profit.
 - Calculate Profit Margin.
 - Compare Profit by Region.
 - Compare Profit by Product Category.
-

Product Performance

- Identify the highest revenue-generating product category.
 - Compare product category performance.
 - Analyze quantity sold by product category.
-

Regional Analysis

- Measure sales performance across regions.
 - Identify the highest-performing region.
 - Calculate each region's contribution to total revenue.
-

Sales Representative Performance

- Rank sales representatives by revenue.
 - Compare profit generated by each sales representative.
 - Analyze sales quantity handled by each representative.
-

Customer Analysis

- Compare sales across different customer types.
-

Sales Channel Analysis

- Compare sales performance across different sales channels.
-

Payment Method Analysis

- Analyze revenue generated through each payment method.
-

Time-Based Analysis

- Analyze monthly sales trends.
 - Calculate Month-over-Month (MoM) Revenue Growth.
 - Identify seasonal sales patterns.
-

Key Performance Indicators (KPIs)

The project measures the following KPIs:

- Total Revenue
 - Total Profit
 - Profit Margin
 - Average Sales
 - Total Transactions
 - Total Quantity Sold
 - Highest Sale
 - Lowest Sale
 - Revenue Contribution by Region
 - Monthly Revenue Growth
-

Expected Business Outcomes

This project helps decision-makers to:

- Monitor overall business performance.
- Identify high-performing products and regions.
- Improve sales strategies.
- Track business growth over time.
- Support strategic planning using data-driven insights.
- Build a foundation for interactive Power BI dashboards.
